GREECE PASSES FROM CHAOS TO ORDER IN 1928

Arrival of Venizelos Regime Marks New Respect for Parliamentary Rule

DRASTIC STEPS TAKEN TO CURB BRIGANDAGE

Premier Wins Confidence of Working Classes Through Protective Legislation

This is the first of a series of three articles specially contributed by the correspondent of The Christian Science Monitor in Athens on the political and economic progress achieved by Greece during the year

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR ATHENS-Notable changes have taken place in the political life in Greece since the accession of Eleutherios Venizelos to power-by far the most notable event of the past year. Armed with an overwhelming popular mandate in the elections of Aug. 19, the veteran statesman has brought a new atmosphere into Par-liament. The discussions are now highly productive, free from profuse oratory and useless debates. Every one in the Chamber listens to him with great respect, and even the Op-position has given evidence that it ppreciates his great lucidity of

It is the first time in recent Greek history that the parliamentary Opposition has assumed a fitting attitude toward the government in power Mr. Venizelos recently expressed his great satisfaction at the change. The parliamentary procedure runs smoothly; government bills are dis-cussed and ratified with exemplary celerity. The Chamber knows that no project is introduced without proper preparation. Immense legis-lative work has accordingly been achieved in the last four months.

Coalition Achievements

But much was accomplished by the Zaimis coalition before it fell. This ministry settled the military ques-tion and the question of the war debt with Britain, America and France. The dispute with Bulgaria respecting the question of voluntary exchange of populations was also settled; by the assistance of the League of Nations a triple loan was concluded in England and America; a pact of friend-ship was signed with Rumania; important railway and roads works were entered upon; the national pa-per currency was stabilized at 375 drachmas to the English pound ster-

Chiang Kai-shek is massing 150,000 men in the province of Kiangsi, presumably to meet a threatened advance of Kwangsi troops from Hankow. The Kwangsi strength is estimated at 100,000 Ranking troops, including the fam-

ous Cantonese Communist Ironsides, 5000 strong, are now being trans-ferred to Kiangsi from Shantung, where the revolt of troops under Chang Tsung-chang apparently is at a standstill. Minor conflicts already have been

reported on the Hunan-Kiangsi borbut the main forces are concentrating in the vicinity of Kiukiang. The Nanking garrison has been dispatched to Kiangsi and the Nationalist capital is so denuded of troops that the cadets of the Military Academy are organizing as a defense force. Anti-aircraft detachments are preparing defenses against air attacks by the 20 airplanes which recently were purchased by the Kwangsi faction. It is believed that the Chinese Navy is likely to remain

POLISH PROSPERITY STEADILY IMPROVES

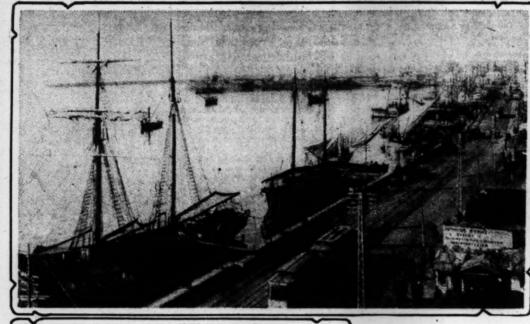

WARSAW (P)—Charles S. Dewey, financial edvisor to the Polish Government and director of the Bank of Poland, reports that "in no other year since the war had Poland enjoyed the degree of prosperity that the country experienced in 1928."

Beginning with fairly satisfactory conditions, the year has shown steady improvement, thanks to fun-damental stability derived from a balanced national budget, a firm currency, and to the absence of disturbing political issues," his reportstated.

BOARD PROPOSED TO HELP CITIES

Main Object Would Be to Obtain Greater Benefits in Tax Expenditures

Just as large corporations have their research departments serving a whole chain of businesses with information to guide their use of money, cities and towns should have a state advisory bureau at their service to help them with data and accu-mulated knowledge as to how they can get the most value for the tax-payers' dollars they spend, a Massachusetts special commission on municipal expenditures and undertakings recommends in its report to the Legislature.

Pointing out that the business of local administration—paving streets, erecting buildings and buying supplies—is little, if any different from that of running a large business or-ganization. Large business organizations, it continues, have developed skill in making expenditures, and the commission believes municipal-ities can exercise similar skill if they adopt research methods of formulatng business practices.

Service to Be Voluntary

The proposed "bureau of munici-Proposal Regarded as Tentative Expression of American Viewpoint be used by the municipalities if they so desired in securing larger returns for public moneys expended." This is GENEVA—An amendment to the Frank G. Allen, Governor of Mas-

Kin of John Alden Who Wooed Priscilla Speaks Out Daily in Poem for 25 Years

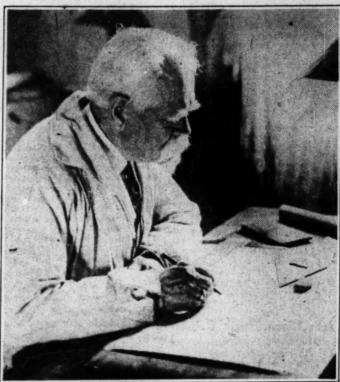

Over in Brooklyn, New York, where they publish the Brooklyn Eagle, To and fro in a room of the high editorial sanctum, Clad in the mode of today, with eyeshade tipped at an angle, Strode with a puzzled air, John Alden, the poetry writer. Buried in thought he seemed, with his hands behind him and passing, Glancing again and again at the words which the typewriter offered.

Twenty-five years had he done this; a poem a day for the Eagle; Written of kings and of treaties, of current events and of Lindbergh: Rhyming of statesmen and children, of mothers and dogs and of babies, Telling in versification the news of the day as he found it. More than nine thousand poems, a quarter century's effort, Came from his facile hand to delight a newspaper's readers.

Now this John Alden, the writer, he of the ninth generation, Bearing the famous name of the Alden who once wooed Pris Like his illustrious ancestor, he, too, had the gift of expression; Like his illustrious forebear, was self-effacing and modest. Only his two initials he signed to the fruits of his labors, Only "J. A." to distinguish the verses he wrote for his paper.

Then came the anniversary, but he did not pause at the milestone Quietly, just as before, he wrote of the day's latest triumphs: But the friends who had loved him sought for him some recognition, Urged him again and again: "Why don't you speak for yourself, John?" And when he wouldn't, they left him, and over the telegraph wires Sent out a story that told of the work of the modern John Alden.

MEXICAN REBELS TAKE MONTEREY; LOSE ORIZABA

Capture Railway Center in North, but Federals Bottle Up Vera Cruz

INSURGENTS THOUGHT TO HAVE 10,000 MEN

Government Forces Estimated at 50,000-Converge on State of Nuevo Leon

MEXICO CITY (A)—Reported federal gains in Vera Cruz have encouraged the Mexican Government following serious reverses inflicted by rebel troops in the north.

The campaign for recapture of Vera Cruz has made good headway under command of Gen. Andreu Almazan, who reported the fail of Orizaba, surrender of 500 troops there, and abandonment of the revolution by the military unit under

lution by the military unit under command of Gen. Miguel Molinar. In an official statement President Emilio Portes Gil said the troops commanded by General Molinar had been permitted to rejoin the Government forces and instructed to go to Esperanza, Puebla, for incororation into the advancing federal armies.

News of serious losses in the north was contained in an official north was contained in an ometal announcement which said the City of Monterey, capital of Nuevo Leon, had fallen to Gen. J. Gonzalo Escobar, whose attacking forces outnumbered the garrison. Among those slain was the federal comnander, Gen. Rodrigo Zuriaga.

Drive Opens on West Coast Another announcement said Gen. Francisco Manzo had started a rebel offensive down the west coast from Navajoa, Sonora. Gen. Jaime Carillo, chief of military operations in the state of Sinaloa, just south of Sonora, was opposing the advance, holding it back as much as possible until he could receive reinforcements.

The situation in the north could only be inferred from disruption of communications between Mexico City and the Texas border. Passenger trains which left this city for Laredo returned after reaching a point between Queretaro and San Luis Potosi, although the line was said to be open

to the latter city.

The line to Cludad Juarez was closed between Queretaro and Zacatecas. The only railroad outlet from the capital appeared to be from Mexico City to San Luis Potosi and thence to Tampico, in the State of

The Grace from the Laudi Spirituali is invariably sung at every Ma-sonic meeting in this country, but the story of its discovery has just been told by Richard Northcott. It appears that when Dr. Charles Burney was in Florence in 1770, searching for material for his History of Music, he visited the Magliabrechi Library and there found the Laudi Spirituali manuscript, which once belonged to a community of reli-gious brothers known as the Laudati, who had established themselves in Florence in 1336. In that volume Burney discovered a fine melody set to the hymn Alla Trinita beata, and printed it in the second volume of his history. The tune was brought to the notice of the British public by Sir Henry Bishop, who, having

Propaganda Suppressed The working classes in general The Indian Bureau has asked for vindicate Mr. Venizelos' policy beannual appropriations of \$25,000,000 cause they know that most of the existing labor laws defending the Greek worker against the more unreasonable forms of capitalism are appeared before the committee to the work of the Cretan statesman protest against alleged attempts to strip them of valuable land and water power sites by private communists are few in number, and should be reduced to almost total inactivity under the present projected law, which provides that no propaganda, proselytism, oral or written, shall be allowed. All the Communists in the government service will be dismissed should they not resign from the ranks of their comrades.

To ameliorate living conditions of the poorer classes, the Government is studying means for the reduction of prices. Wheat bread forms the staple in bushes and dollars but in parent-article of nourishment for the Greek hood and citizenship. The Master Venizelos has reduced the tax on wheat and flour importations, mostly coming from the United States and Canada This measure was received with considerable murmuring by the

Defends Wheat Policy Mr. Venizelos denied that a protectionist policy in this case would be useful to the country. It was al-leged that the Greek cultivator was poor and his power of productivity very low, and that he could hardly effect a gain of 50 drachmas per stremma, so that state legislation was needed to defend him against foreign competition. He replied that the only way out of the impasse George Cafandaris, at that time Minister of Finance in the Zaimis Cabinet.

Venizeles Returns

The only way out of the impasse
would be improvement in the methods
of farming which would enable the
cultivator to obtain greater results
from his labor. Through intensive
cultivation, the farmer could secure a gain of 75,125,225 drachmas, he said, adding that it would be criminal to make the farmer believe that his

Master Farmers in 26 States Feel Pride in Distinction Won

Idea That Originated With Editor of Farm Paper Spreads—Candidates Compete Eagerly for Honor -Winners Form National Union

SPECIAL FROM MONITOR BURRAU CHICAGO—A bumper crop of didates. The method used in Illinois, "Master Farmers" is being reaped in Wisconsin and Indiana, the first 26 states this year, a new and flour-lished the procedure for the others. ishing product of the American soil. d to previous harvestings, it title are free for all and entries come swells the total of practical farmers who have received this honorary agricultural decree to something wives. But the records of each nomination of the property of the proper around 400 in the four years it has

been given. They wear their medals proudly. To an increasing number of people both on the farm and in the city that token dangling from the farmer's watch is coming to mean that its owner has made a success not merely from recommended candidates. A article of nourishment for the Greek people. To render it cheaper, Mr. Farmer gets his title like the Rhodes scholar, for a well-rounded excel-

Unusual qualifications must be met before he can wear this medal: Has he installed labor-saving devices for agricultural interests, and their views his wife? Does he take her on trips were echoed in the Chamber. , once in a while? Has he been a helpful father? Is he active in church work?

The idea started here. One day to the desk of Clifford V. Gregory, editor of the Prairie Farmer, came a booklet entitled "Fifty Famous Farmers." He found that every one on the list had made his fame by leaving the farm.

The idea started here. One day to the movement on its feet. An Indiana Master Farmer, on a motor trip through Michigan, looked up the Master Farmers in that section and made their acquaintance. "He told me they all greeted him like a long lost brother," said Mr. Gregory. Last summer Master Farmers from all leaving the farm.

That started Mr. Gregory thinksummer Master Farmers from all ing. Why not find a way to honor the parts of the country met at Urbana, farmer who stayed on the soil? What

could be done to recognize the man tion to promote this feeling of who did a good all-round job not only of farming but of living on the farm?
A score card which would set up VISCOUNT WILINGDON a standard for the expert agriculturist was devised by the staff of the Prairie Farmer, which is called America's oldest farm paper. It established an ideal of 1000 points. Nearly half of them, 450, were to be scored on home life and citizenship.

The score card was put out by augurated in Macedonia, Thrace and territories and now a group of rural Thessaly; and roads will be built and repaired to render communications between towns and villages easier, quicker and cheaper.

Your Dealer Will Demonstrate These Radically Improved Outboard Motors

Never before have we offered so many and such radical improvements as are embodied in the new Johnson SEA-HORSES. They wholly revolutionize this sport. They obsolete all previous outboard motors.

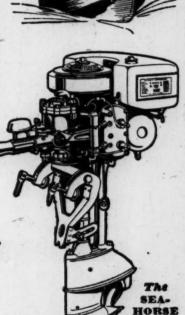

The Release Charger, a wonderful new invention, makes starting positive under all conditions. It cuts starting effort so drastically it can no longer be called an effort. It adds immeasurably to outboard enjoyment. The Underwater Exhaust eliminates exhaust noise and

gases. It restores peace to our waterways. The Rotary Valve in the SEA-HORSE 32 and SEA-HORSE 16 makes possible 50% more power per cubic inch displacement than ever before developed in an outboard.

With so much to gain from a SEA-HORSE, can you be content with any other outboard motor?

NEW CHINESE FACTORY LAW

Charged With Obtaining **Inspiration From Moscow**

SPECIAL TO THE CHRISTIAN SCIENCE MONITO PEIPING, China—A factory law which provides more benefits for the worker than he receives at present in any eastern country, including Japan, and which includes one clause almost communistic in its portent, has been drafted by the Ministry of Industry, Commerce and Labor of the Nanking Government, and re-quires only the approval of the State Council for adoption.

The draft of the law, published officially, has aroused a storm of protest both in the Chinese and foreign press in China. Editorial opinion is quite general in declaring the law cannot possibly be enforced in the present state of China's economic development, and that if it were enforced. China's infant industry would be completely destroyed. The charge is made against those responsible for the law that they have altogether ignored realities in China. and that this particular law is of very doubtful value in any country.

Improved by Moscow In fact, the law-makers appear to have got much of their inspiration from Moscow. The outstanding examples of this are Chapters 8 and profit of the factory after due deduction for the reserve fund should be desire to reform, his sentence may distributed among the management and directors; 45 per cent among the stored. shareholders; 45 per cent among the workers." This profit-sharing is not in lieu of wages, for Chapter 7 provides that minimum wages must be established, based upon the living costs in the part of China where the

factory is located.

Chapter 10 again reveals the influence of Moscow. It provides, 'for the establishment of works' councils in factories employing not less than 30 regular workers. The works' councils shall be composed of an equal number of representatives from both the employers and employees.

Sentences of capital punishment will be executed by hanging and not, as heretofore, by shooting.

The most important feature of the law is that it will be applied throughout the whole kingdom and represents the first part of a complete ployees. the establishment of works' councils

Works' Councils' Functions

The employees' representatives now in force.

shall be separately elected to repreimprovement of factory conditions criminal offense. and to initiate enterprises for the

day. In some Western countries and in Russia it is now felt that an eighthour working day is perhaps a little too long. This clause goes even further and provides that, owing to varying local conditions and the

4. E. Brehm's Fame Rests Safely on His "Tierleben"

fred Edmund Brehm has awakened interest in this first great modern naturalist of Germany.

In 1847 at the early age of 18 he joined a certain Baron von Mueller on an ornithological trip to Africa. He returned to Europe and attended technicalities of natural science.
While there he wrote his first book, "Travel Sketches From North-East Africa." Later followed extensive Africa.' Africa." Later followed extensive travels in Spain and again in Africa. Then came his "Animal Life" ("Tierleben"), the really great book upon which his reputation of today firmly rests—a book so fascinating that it is still a delight to all animal overs in its descriptions of the habits of wild animals.

SPECIAL TO THE CHRISTIAN SCIENCE MON VIENNA - During the last few months Austrian public opinion has been much concerned with the need for introducing certain definite legal changes. Many of the leading lawyers have put forward sugges-tions for a new codification of the

laws and have declared that much recent legislation lacks conciseness recent legislation lacks concludes and uniformity, so that the legal profession itself is sometimes continued Edmund Brehm has awakened as to the right interpretation to accept. They would like to see a simplification of the whole legislation in the legal profession itself is sometimes continued by the company of the second legislation in the second legislation legislation in the second legislation in the second legislation legislation legislation legislation in the second legislation legislation legislatio of a "vacatio legis," that is, an inthe universities of Jena and Vienna lic point of view has been the recent in order to perfect himself in the parliamentary decision to bring the Austrian marriage law into conformity with that of Germany. More important from the pub-portant decisions in criminal cases

Public attention has also been con-

leading public men, regardless of their particular party politics, have demanded changes. This is due to the fact that during the past 10 Co-operation With years, the decisions which juries have arrived at in a number of outstanding cases have been obvious miscarriages of justice. But on examination it will be found that the fault lies not so much with the jury system as with the actual manner in which the juries are chosen. As in so many other important matters, party politics are allowed to exert an irresistible influence. Statistics also reveal the fact that 12 per cent of the jurors have already been punished by law—exemption from sitting on a jury is only for a certain short period, after a term of imprison-ment—while in the jurors' list for the Vienna Penal Courts, were the

To remedy this state of affairs, it is proposed that in future political parties shall have nothing to do with the election of the jurymen, and that in order to educate the jury along the right lines, a judge should be of late have tended to shake the confidence of all thinking men in the impartiality of the law courts, but also because the effect of that lack of confidence has already shown itself in serious public unrest.

Native Planters

New System of Development of Native Areas Seen in Palm Oil Plan

SPECIAL FROM MONITOR BURRAU LONDON—A plan whereby owners of palm oil trees should form do-operative societies, transferring the operative societies, transferring the management of various areas to European factories established on them, for definite periods, has been proposed by the Nigerian Government. The main purpose of this plan is to organize the native palm ellowed the part of producers into a proper plantation system under the direction of the uropean managing company.

This plan opens up a new method of development by Europeans of native territories, without convert-ing the people into a landless prolesystem being developed in cotton growing in the new irrigated area in the Sudan. Here the Government provides the land, the cultivator (on long leases) the work, and the Sudan Plantations Company, the fr-rigation and marketing. Each has a

THEM FOR \$10?

THAT would you take for your stocks, bonds and family jewels? How much for your deeds, will, contracts, income tax data and other vital papers? Ten dollars? Probably not thousands!... Yet, unless they are strongly protected,—any day or night you may give them away for nothing! In spite of the highest police efficiency, burglars and thieves are always at work. In spite of faithful fire protection, millions go up in flames each year.

Don't trust the delusion of an office safe, a desk drawer, dresser or old-fashioned strong-box. A Safe Deposit Box in the great steel vaults of the Shawmut Bank will give you absolute protection for as little as \$10 a year; also the use of private coupon rooms where you can look after financial affairs in leisurely convenience.

Why not rent a box today? You will be constantly thankful for this safety and peace of mind, and you will enjoy the courteous attention you will receive.

Intercollegiate, Club and Professional Athletic News of the World

tively, and in pairs, made a clean among the spectators. The summary: sweep of the three events in the North American figure-skating champion-ships, held at the Boston Arena, Monday and Tuesday. At the completion of the first day competition, it had been conceded that the two Canadians held the edge slightly in school figures, but the official rating of the contestants at the end of the final day of the two-day program disclosed the fact that Roger F. Turner had a slight edge on Wilson in school figures, but could not match his opponent in free skating, while Miss Wilson's margin of victory in the women's singles was actually attained through her superiority in school figures.

Experts fully acclaim the fact that American figure-skating champion

Miss Maribel Y. Vinson of the Boston Skating Club, women's champion of the United States, is unexcelled in free skating by any woman skater on the continent, and Tuesday's free skating found her at her best in that phase of the sport. It was a question, however, as to how strong Miss Wilson would prove in free skating, and whether or not she could perform well enough to hold the advantage that she had gained over her Boston rival in school figures. Miss Vipson was superb in her spins and displayed an athletic ability that gave her program a dash and speed that was brilliant to watch. Miss Wilson must have shown some of the best free skating of her career, for it was not far below the level set by Miss Vinson.

As for Montgomery Wilson his free skating excelled that of his stockier rival. Roger F. Turner, and he took full advantage of his greater agility to mark up a big margin. He performed a double spin while in the air that skaters consider about the best that has been seen in Boston and he executed all his jumps without a miss. Throughout his stay on the ice his performances were full of the grace and easy motion that marks the experienced campaigner.

In the pair skating there was closer competition with Nathaniel W. Niles and Mrs. Charles B. Blanchard, where and There was theights and capturing second place theights and capturing second place.

WILSONS SWEEP

SKATING EVENTS

this year and last. Niles and Mrs. Blanchard started skating in pairs in 1914 and won 10 United States titles. Tuesday they showed a return to their former greatness and it was only after a keen discussion among the judges that the Wilsons were awarded the victory. The two Canadian judges were both against their own representatives while the two United States judges were for them. The decision was finally made in favor of the Canadians due to their flawless performance, although at times it appeared as though they were skating more as individuals than as a pair. The champions are newly crowned ones as the 1927 North American title holders were all out of the competition. Miss Beatrix Loughran, United States and North American women's champion for several years, was among the spectators. The summary:

Vancouver City has declared a winner in the Ex-King Georges, this team having reached championship strength

Toronto Leading O. H. A. Toronto Leading 0. H. A.

While there has been only one senior loop in the Ontario Hockey Association this season, there have been some stirring tilts among the four entries. Toronto varsity, while being the class of the league, has been pushed by Queen's University throughout the piece. Queen's gave the Blue and White their first setback, and when Preston earned a close decision over the collegians a few nights ago this was but the latter's second league loss. Tothe latter's second league loss. To-ronto defeated Queen's, 4 to 2, in the first of their two-game series for the title, and the winner will await the victors of Intermediate O. H. A. versus Senior N. O. H. A. Approximately 20 groups were de-clared winners in the intermediate

vancouver City has declared a winner in the Ex-King Georges, this team having reached championship strength after three seasons in senior hockey. One of the pre-season favorites, the Towers, had misfortune all winter, while the Monarchs lost the title series to the new champions. The latter will now meet Trail or Rossland in the B. C. finals and for the right to enter the Allan Cup play against Alberta titlists.

Prairie Teams Engaged

In Alberta, the Maples and Elks are now engaged in a series for the Edmonton City title, the victors of which will face the southern champions in the provincial finals. At present it looks as if the Calgary Bronks will triumph in the latter loop, those closely pressed by both the High River Fliers and Drumheller Miners.

The Melville Millionaires are the plek of the Big Six with Regina Vics and Regina Aces at it for the right to face the leaders. Four teams have been bunched for second and third place all along.

In Manitoba and the Thunder Bay district of Ontario, this whole section comprising the Inter-Provincial League, the University of Manitoba puckmen have not lost one single league match this year. The only team which has given the Canadian champions any serious opposition has been Port Arthur. The Ports, always a great hockey machine, will tackle the leaders in the series for the right to represent their circuit in the Allan Cup quest.

RESULTS TUESDAY

The Boston Bruins went into a tie for the lead of the United States divi-sion of the National Hockey League standing at the Boston Garden Tues-day night by defeating the New York Rangers, 2 to 1, in one of the best played games here this season. As a result of the win the Bruins have an excellent chance to secure the top place before the end of the season.

having five games yet to play against only three for the Rangers.

Although there were three goals scored, the real earned chances were taken care of by the goalies and the goals that did count were of the forcoals that did count were of the for-tunate variety, all long shots that took queer twists to beat the goalies. Throughout the major portion of the game the local team clearly outplayed Rangers. The first period was deci-sively in favor of Boston, although Rangers had more shots on goal, mostly long ones. For a few minutes in the second session Rangers took the offensive and secured a one-goal lead, but from then on Boston again lead, but from then on Boston again commanded the play. After the tying and winning goals in the third session, Rangers staged a desperate offensive to retrieve their lost advantage, but

At last the meeting took practical desire to encourage middle and long distance swimming urges upon districts the desirability of promoting through affiliated clubs one or more championships from 880 yards to the

can't be in unless they should win their last two games, while the To-ronto Maple Leafs lose every game. There was no question about the re-sult. The Cougars were held even in the first period, but took a 2-to-1 advantage in the second and then scored the only goal of the third, while the one mile."
To American eyes it would appear curious indeed how men's interest in competitive swimming here has waned invaders were vainly striving to rally invaders were vainly striving to rally.
Connors and Cooper were the home club stars, sharing all the scoring honors between them. Connors opened the scoring with a brilliant individual effort in the middle period and 10 seconds later, fed Cooper a pass on which the right winger made it 2 to 0. Stewart beat Dolson for the only Montreal score late in the period, converting a pass from Dutton. verting a pass from Dutton.

The Maroons were down two goals

Six Enter Half Mile In the half mile six men entered, four started and the victor was nearly at half time there was a goal a side—a minute behind the "standard" time. Then the invaders wrecked their own chances of a successful comeback by drawing a series of penalties. Their defensemen were banished four times, while Phillips received a major, along with Brophy.

Eight thousand patrons enjoyed the exciting finish, which made up for a listless start. Daley, a 20-year-old left wing man from Fort William, Ontario, made his debut with the Cougars and created a very favorable impression.

DETROIT MONTREAL And these were the national championships. W. A. H. Bullern, just retired from the presidency of the A. S. A. proposed in an interview some while ago that the present system of decentralized championships instead of grouping the events together at big meetings might be held responsible in some measure for the existing deplorable state of affairs, and surprise was occasioned therefore when a proposal for grouping championships was put onto the agenda at this year's annual council meeting by southern delegates who proposed three galas, each lasting two days, should be held annually between July 1 and Sept. 30. At these galas all national events except long distance races for men and women should be decided. The recommendation was referred for consideration to a special committee along with the proposal that a diving coach should be brought over from a merica on an English coach sent to America to study diving methods and training there.

The main topic of conversation in field hockey circles this week has been the selection of the veteran S. H. Saville for the English team for the selection of the veteran S. H. Saville for the English team for the match with Sootina Saturday. Saville first galned his "cap" for his country in 1913, yet in the final trails Saturday of the revealed a genius as great as, ever that supplied fine play behind most of The Rest's backs. His excellently timed passes were a continuous source of anxiety to the opposing defenders and his stick work an object lesson. He scored on of The Rest's goals and his stick work an object lesson. He scored on the others. The final score was 8 to 2 against England.

This result and the events leading to it presented the selectors of a national team with a "knotty" problem or two was 8 to 2 against England.

Wilks Lowrey by My Livin A McKinnon. America to study diving methods and training there.

The Amateur Diving Association has not had to contend with apathy, indeed entries in the men's events for 1928 were the highest for some years, but followers of this graceful pastime have a dire lack of suitable facilities for the development of talent as well as competent coaches.

England's only consolation as far as distance speed swimming is concerned is the retention of a good style and to this President Colwell made allusion at the dinner after the annual meeting, remarking that even America where most of the swimming laurels now repose, conceded the English swim-

which they have attempted to solve by the introduction of five new "caps" for the game with Scotland.

The Daily Mail in today's issue mentioned the formation of a new and "different" international sports club for men and women with membership representative of all nations. The names associated with the scheme are Harry Payne Whitney, American millionaire aportsman; Duke Penaranda, renowned Spanish polo player, relation to the King of Spain; Duke of Westminster, British sporting peer. The object the Daily Mail says is the promotion of international friendship and the club was inspired by the remark made by the Prince of Wales not long ago: "The best of friendship, whether individual or international, is that made on the field of sport."

CANADIAN-AMERICAN HOCKEY LEAGUE STANDING

PROVIDENCE, R. I.—Boston Tigers took undisputed possession of first place in the Canadian-American Hockey League here Tuesday night by routing the Providence Reds 4 to 1 before a capacity crowd of enthusiasts. The Tigers scored early and dominated the play throughout. the play throughout.

Lapses by Murray, Providence

goalle, accounted for two of the Tiger's goals, but the Tigers were by far the superior team in spite of these. The victory was the fifth straight for Boston, but only their first in six games against the Reds. It puts Bos-ton two points in the lead. Boston's goals were scored by Waite F. Contant, Mackey and Taylor. The Tigers scored two goals in a span of 16 seconds late in the first period, added the third in the second and mid-way through the fourth secured final goal. Hart scored for the Reds

at the start of the third period.
Waite's opening goal followed splendid bit of stickhandling through the entire Providence team and he beat Murray from close up. Contant's shot from the blue line trickled in be-tween Murray's skates 16 seconds later. Mackey's goal was one of the longest scoring shots ever made on the Auditorium ice. Taylor netted Louck's rebound for his score. The summary:

The Fashionable Glove

LOVES of the somewhat dressy, T semitailored type, are sponsored by so many of the famous French designers of clothes, that this influence is responsible for novelty of cut and decoration. Ornamental fastenings, rows of tiny trimming buttons, stitched tabs, inset godets to give extra fullness, pipings of contrasting color, ribbon cuffs and the like are all dressmaker touches which the glove manufacturers have been obliged to accept. There is still the plain sports glove which shows little change other than pipings of a sharply contrasting shade and a slightly more ornate closing, as, for instance, a bone clasp or buckle of color matching the piping or a set of link buttons. The closing is somewearroom and others are decorated times at the top of the wrist, giving this bit of decoration more prominence. The overseam stitching is also permissible for the otherwise plain glove and various novel corded effects are seen, all of which bespeak novelty even though in a most rethan the usual method where stock is strained manner.

It is the more formal glove that in-troduces the unusual, both as to combinations of color and method of fastening. These are the features that should be considered by the woman purchasing gloyes for other than the most utilitarian purposes. the use of customers while trying The model known as a "mousque taire slip-on" is one of the latest and mule pattern, man's style, and are most popular, being plain enough for not for sale, but merely for the comgeneral daytime wear and yet sufficiently dressy for the formal afternoon costume. This glove comes in a pliant French glace kid in delightcustomers in the clothing depart-ment. These robes are also to be of rose" is a particularly fashionable tone of pastel beige with a slight rose cast. This type of glove is While these details may appear extreme and even amusing, they are shade which is repeated in the but-interesting in that they are designed to meet an evident demand for such quetaire glove is growing in imporervice. Moreover, it should not be tance, it is well to observe this detail taken for granted that prices are in the selection of new gloves. Hownecessarily exorbitant, and that only ever, the reversible cuff-top gloves large sales receive this de luxe atcome in greater variety than ever, tention. "Sing a song of seasons!
Something bright in all!

What he might have done is indicated in the fine prose he has written here and there about the seasons.

Lovers of Stevenson will recall his the seasons.

"A Wilver's Walk in Lovers of Stevenson will recall his fragment on "A Winter's Walk in his felicitous phrasing I find re-Carrick and Galloway," and also his enforced by Tovey who wrote con-essay on "An Autumn Effect." But

Then I recalled that another poet of Scotland, living long before Stevenson, had attempted that for which Stevenson called. A poem written two hundred years ago must have rare virtue if it find many readers in our time. Thomson is not a poet much spoken of in this day. When I was a lad it was the same. The greater worth of Wordsworth was the fact that counted. Thomson was accounted a minor poet. I passed him by that I might the more read in Wordsworth, the major poet. You will notice that I say "in," not "through," Wordsworth, I remember to this day the patience and per-sistence with which I worked at "The Excursion." It was no holiday

Our "daily bread"

WRITTEN FOR THE CHRISTIAN SCIENCE MONITOR

itself with what it caus is "daily bread," and often regards this question as a perplexing feed the famished affections." Man in God's image and likeness is spiritual; sify all its needs, urgent or remote; and then it clamors and struggles for are spiritual. What mankind needs is food, raiment, and shelter. Not only grace,—comprehension, understandso, but many regard the struggle as ing, intelligence, knowledge of the the inevitable result of the curse said to have been pronounced upon Adam: 'In the sweat of thy face shalt thou mankind love? For what does maneat bread." Believing this, it is not kind daily strive? Is it not often surprising that mankind oftentimes material wealth, physical health, selfmeets with seeming failure in its indulgence? When these are the efforts to gain what it terms a satisfactory competency.

This struggle for existence, howaccepts and elucidates this state-Key to the Scriptures," Mary Baker stantly being fed by divine Love. Eddy writes (p. 332), "Father-Mother is the name for Delty, which indicates His tender relationship to His spirit- that he needs, and if his needs are God, who is Love, and Father and Mother, would abandon His creation Christ Jesus gave us the Lord's and oblige it to shift for itself.

do they reap, nor gather into barns; they?" Could anything be plainer? ence of all His ideas.

Mankind's doubts arise from the wrong concept of man and of what constitutes "daily bread," and daily need and supply. The petition in the Lord's Prayer, "Give us this day our

The Spring Break-Up

It is all so big. No words of mine Can catch its tender tranquillity; When little summery brooks Rush clear Those of Italian hills: When frogs make Siender silver sound. And the eaves drip Intermittently. From fast-departing snow.

That smell of snow And grass running down The hills together, In a mad search For spring-It is all too tranquil, Are neither black or white, To put on paper, That once lived And breathed and knew. With such greater sympathy. This same gray world. -LORNA GREENE, in "Morning Moods

ANKIND anxiously concerns | daily bread," is spiritually interpreted itself with what it calls its by Mrs. Eddy in Science and Health therefore, his needs and his supply real man's unity with God. What are the "famished affections"? What does prime objects of one's affections, it is not strange that there is at times a seeming famine, for these things ever, is no part of God's plan for His cannot truly satisfy. The real man's creation. In the Bible we are told affection for purity, courage, unselfthat "God is love." Christian Science ishness, goodness, patience, meekness, humility, compassion, and all ment. In the textbook of Christian the other spiritual qualities of Love Science, "Science and Health with can never be starved; for it is con-

One might argue that if God has already given to the real man all ual creation." It is unthinkable that spiritual, there can be no need to ask for "daily bread." Inasmuch as Prayer and its petitions, it must be Does not Christ Jesus' Sermon on right to ask God for what we need; the Mount, especially that portion of but the Way-shower also said: "What it which is found in the sixth chapter things soever ye desire, when ye of Matthew, furnish much that is pray, believe that ye receive them, helpful in dispelling doubts of God's and ye shall have them." If we note loving care at all times and under Jesus' method of asking, we shall all circumstances? In it Christ Jesus, see that his petitions were earnest said, for instance, "Behold the fowls affirmations of man's spiritual unity of the air: for they sow not, neither with the Father, from whom man possesses all good. True asking, yet your heavenly Father feedeth then, is turning to God and praying them. Are ye not much better than that one may realize the ever-pres-

The Master's simple, everyday illus- Mrs. Eddy shows us how to trations bring home to us the prac- make practical this truth about tical power of his teachings. Who spiritual supply when she states in has not watched and enjoyed the "Miscellaneous Writings" (p. 307), freedom of birds, and noted how their "God gives you His spiritual ideas, needs are met? Why do we not profit and in turn, they give you daily supby these illustrations, and cease fear- plies." To illustrate, a young man ing and doubting? Why do we not who was a designer became a stustrive to realize that Love's provision dent of Christian Science. When he s always at hand for all of God's realized that man reflects the intelligent ideas of divine Mind, he was enabled to express this fact by an increased output of designs. This, in turn, increased his efficiency as an employee.

There is no circumstance in which divine Love is not an available and practical help. God, who cares for the birds, those tiny denizens of trees and fields, is caring for His arger children. Man, as God's image and likeness, dwells in divine Love, is clothed and fed by Love. The understanding of this truth will free mankind from poyerty and the bondage of finite material beliefs. Christ Jesus declared: "Even the very hairs than many sparrows."

HIGH MONEY RATES CHECK PRICE RISE

Stocks Lose Early Gains When Sharp Reaction Gets Under Way

NEW YORK (A)-The stock market isplayed another complete reversal of form today, rallying briskly in the morning, under the leadership of the copper shares and then turning reactionary when the call money rate was marked up from 8 to 10 per cent.

Many of the early gains of 1 to 7 points were cancelled, and a long list of issues sold 1 to 5 points under yesterday's final quotations.

The rise in call money was accome.

The rise in call money was accompanied by only a moderate calling of loans, indicating the extreme sensitiveness of the money market on the approach of heavy midmonth tax and

Treasury financing demands. reasury mancing demands.

Bankers recently have been showing reluctance to replace called loans, and there has been a marked reduc-

and there has been a marked reduction in the supply coming here from outside sources. The recent decline in sterling here has revived fears in London of a further American drain in British gold, but bankers believe the Bank of England would again increase its discount rate if such a movement assumed large proportions.

Coppers made a good response to the Anaconda Copper Company's funded debt retirement program. Utah jumped 15 points to a new high at 340, and Anaconda ran up 4½ points to a new heak at 163. Kennecott, Nevada and Chile also moved into new high ground. Some of the gains were cancelled in the early afternoon selling movement.

Silver jumped 6½ points to a new top at 150, asd Associated Dry Goods, Custiss, Johns Manville and Stewart-Warner sold 4 to 5 points higher before the selling movement started. Radio (old stock) was hammered down 7 points below last night's close to 381, duplicating yesterday's low; Otis Elevator broke 5 points, and International Telephone, Pere Marquette, Spicer Manufacturing, Union Carbide and Atlantic Coast Line, all sold 3 to

news to influence the price movement.
The weekly steel trade reviews continued optimistic, Iron Age reporting that pig iron output registered another gain in February, with steel production for the whole industry ranging

from between 90 to 95 per cent.

National Bellas Hess announced the
activities of 11 southern stores, and
dividends were inaugurated on the
common stock of the National Rubber

and such representative issues as U. S. Steel, General Motors and General Electric turned heavy. Adams Express dropped 35 points to 515, and Radio (old) extended its loss to 18 points, touching 370. Among issues losing 3 to 6 points were Allis Chalmers. Delaware & Hudson. Packard, Chrysler. Western Union, Electric Auto Lite and Union Carbide. The closing was heavy. Total sales approximated 4,100,000 shares.

.....12.40 12.47 12.40 12.4512.75 12.82 12.75 12.80 LONDON WOOL SALES LONDON (49)—A large number of buyers attended the opening of the second series of wool sales today. A moderate selection, amounting to 8815 bales, was offered, of which 8000 were sold. Competition was fair at generally lower prices. Buying of merinos was slow and many lots were withdrawn. Greasy merinos sold from unchanged to 5 per cent lower, and scoureds declined 5 per cent. Fine crossbreds lost 5 to 7½ per cent. Punta arenas offerings were in fair demand at 5 per cent decline.

INTERNATIONAL CEMENT Pamphlet report of International Cement Corporation for year ended Dec. 21, 1928, shows net income of \$5,149,388, equivalent after dividends on preferred stock (retired in May, 1928) to \$7.90 a share on 618,826 common shares. This compares with net in 1927 of \$4,554,172, or \$5.90 a share on 562,500 common shares after preferred dividends.

DENVER & SALT LAKE RAILWAY NEW YORK—Denver & Sait Lake Railway declared 6 per cent interest payable April 1 on its \$11,000,000 income bonds for 1928. Payment of 4½ per cent was declared a year ago for fractional period of 1927 following reorganization.

REPUBLIC IRON & STEEL Republic Iron & Steel Company, oungstown, O., is planning to estable a laboratory in connection with its seel and tubes plant to develop its pants on steel tubes and the electrical elding method of tube manufacture.

RAW SILK USE DECLINES Consumption of raw silk in February declined markedly, the Silk Association of America reports. Deliveries totaled 46,228 bales compared with 57,349 in January and 50,679 in February, 1928.

LONDON QUOTATIONS LONDON, March 6 (P)—Consols for money today were 54%. De Beers 13% and Rand Mines 3%. Money was 4% per cent; discount rates—short bills and three months 5% 6 h per cent.

BOOK REVIEWS AND LITERARY NEWS

Three Self. Portraitists

A Confirmation

HEN a writer produces a then he can be taken seriously. That is what Daniel Chase has done. In fact, his new novel, "Pines of Jaalam," not only keeps up with its predecessor, "Hardy Rye," but in our opinion surpasses it in firmness of construction and in sustained

The scene of "Pines of Jaalam" is that which Mr. Chase used before, an inland Massachusetts town, partly agricultural, partly manufacturing, and surely suggested by his own town of Holliston, Mass. The period is much more recent than that of 'Hardy Rye," and more compressed. It is about the time of the World War, but that is not significant. The story again centers in a farm; more specifically, in a woman who mas-tered a farm, and in so doing was

mastered by it.

Lavinia Copeland's father had left her a farm, and with it the care of her younger brother and two aunts. It was a lonely spot at Road's, End, on the edge of Jaalam Marsh, but forthing was not afraid of loneliness. Lavinia was not afraid of loneliness or work. She tended the farm, sold oilk and kept both ends together, but she did it all ungraciously, with discontent. Yet she refused to sell the farm. She would hold on for a while, and before long she saw a way. Her father had planted some pines as an investment for the future, and by chance Lavinia dis-covered the money value that there is in young evergreens. She recalled the nursery on the Chesham Road, with its ranks of little trees. The very earth of Copeland's seemed to promise her help, and upon that assurance she made her decision and began her work of transforming her

farm into a nursery.

The farm responded. Copeland's prospered. Lavinia was a driver and plowed ruthlessly through her diffi-culties to success. She set out her own lots with evergreens, she bought more land, she built a new house, sent her brother to college and gave her aunts vacations they not want. She was a successful woman and gloried in it. But she could not stop. Copeland's meant everything to her. When it should be completed, she would, indeed, be at

As Lavinia concentrated her whole life on Copeland's, other things fell away from her. Her brother, her aunts, finally Lewis Butler, whom she had promised to marry, one by one perceived that she saw them only as adjuncts to Copeland's, and one by one withdrew. Then, when the farm had shut out everything else, it was enough for her. That was where

cause the excellences of style and structure, of characterization and feeling, are interlocked and interdependent. At the foundation of his dependent. At the foundation of his gift, Mr. Chase has an intense love no satisfactory account readily avail-for New England soil, a sensitive able. The fact that Miss Bowen does the fall of De Witt in 1672 becomes a able. The fact that Miss Bowen does with the families which have tilled it for generations. For him a farm has individuality; its transmission from generation to generation gives it dignity and a claim upon those who inherit it. Yet the men and women who live on it are not its slaves, beaten by toil into dumbness. They are, rather, intelligent partners of the soil. Lavinia exasperates the reader, and the well calculated to do this. minor characters, shrewd but kindly, Most Englishmen are proud of the are able with their brief and pungent results of the revolution of 1688 but speech to hold their own with any- few can take any pleasure in the one. Aunt Hat, for instance, who has manner in which it was accom-

room, is the perfect example of a managing old lady.

HEN a writer produces a second novel that in no way falls behind a good first, he can be taken seriously. What Daniel Chase has done, t, his new novel, "Pines of L" not only keeps up with managing old lady.

A love for his chosen field and an understanding of his characters would not be enough to give Mr. Chase's work the distinction that it possesses, if he could not write. His choice of significant incidents, his ability to make his people and dorsement than his own name.

their affairs seem important to the reader, are dependent on his crafts-manship. More than that, he is able Pines of Janlam, by Daniel Chase. Instepped out of somebody's sitting-dianapolis: Bobbs-Merrill. \$2.50.

Stepped out of somebody's sitting-land and marsh, of stealing mists and winter moons. When he writes about such things he sets one's own

facile pages, so studded with figures of speech, become glib. There is Two Vagabonds in America On Wandering Wheels, by Jan and Cora Gordon. London: The Bodley Head. 12s. 6d. New York: Dodd, Mead, \$3.50.

FTER reading the Gordons on the United States, the European reader will put down the book with the feeling that now he understands. By their artistry they have in fact drawn the sting

Every chapter is full of people: the people of the small ships, the "hot dog" stalls, the fairs, the camp-ing ground, the mine, the Show Boat they have in fact drawn the sting from the jargon of international politics and exploratory sociology. —and always with a strong season-ing of the recently assimilated immi-The relief—to the European and per-haps to the worried American—of grant. There is, for instance, that German hotel keeper in Pittsburgh who particularly liked his customers to be musicians. His tender methods discovering that the United States is discovering that the United States is inhabited neither by "problems" nor, in the words of Mr. Mencken's romantic boast, "a hundred and ten million human beings, all of them alike," but by people of amusing variety, is indescribable.

It is sometimes a disappointment that markens that the European

bring tears to the eyes:
"One side of the hotel overlooked the street with its trams and general noisiness, the other gave onto a vista of inferior roofs and sporace but to Americans that the European traveler does not become enthusiastic about America's historical treasures. But the European's attitude is undersilent washing. So our host had his guests sign in under the qualities of tive ones, the cornets and the trombones, bass fiddlers and bassoons, he put in the front where they could hold their own against the traffic; but the daintier, the violins, flutes, oboes, or

clarinets he set at the back."

It will be objected that the Gordons did not see the "real South," if by that is meant the aristocratic South of tradition. Most of their time was spent among the Negroes and the "poor whites." Here the Gordons tread delicately among controversies and social problems; but by telling exactly what they see and letting that speak for itself they have manag to give an unusual and moving pic-

The Gordons are supreme in the art of the "write-up." They sacrifice people to background. A dozen words spoken at a camp wash basin are more precious to their purpose than the moods and dreams of land-scape. Also, as travelers they meet chiefly those who travel and those who attend to them. In a travel book, as in the film, the sense of depth is illusory. One of the strangest ex-periences of the traveler is that he is irremediably cut off from a huge. mysterious population whose ways

he can only guess at.
We think that the Gordons' book makes a valuable contribution to Anglo-American understanding, all the more valuable because this was not their primary object. They have the disarming manner of the old choruses, "whose only purpose is to please."

It is not therefore surprising accused him of copying "something "The Life of Charles M. from a book with the strange title of we have not only a model Mr. Hardy's Dynasts. Not moving in that in "The Life of Charles M. of what biographical method ought the Literary World or reading the Those whose knowledge of Doughty Author and remain in my ignorance its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is a meaning its abridgement, "Wanderings in And some fifteen years later he one who is who by sion for Mandates. Arabia," will no doubt be surprised wrote, "Not having a Who is Who by Sefior Palacios" states he was a supplied to the whole of the whole o

lieved his best work to be a poem, ton . . . may be." written during the war. A cousin describes the "singular Indeed, it was as a patriotic poet who should revive the glories of Spensorian, even Chancerian, English, and serian, even Chancerian, English, and her father's country house in Sufnot as a prose writer, that he re- folk. He appeared . . . "with whitish garded himself. His one prose work cotton clothes of some soft eastern was written in that medium only as a concession to the reading public. Yet for most people it is this master piece of rhythmic narrative upon which his fame rests today. Whether later generations will reverse this us immensely."

judgment is a matter of opinion, but it is at least certain that the poetic foibles, but Dr. Hogarth, with craftsman of the future will be repaid by a study of the half-dozen allegorical works to each of which Doughty devoted many years of ardu-ous composition and ceaseless re-against odds. Dr. Hogarth has fame which came to Doughty the course of the struggle. Had he in his later years was not won survived to complete his labors ne easily. The "enormous manuscript" of "Arabia Deserta," Dr. Hogarth present volume, which is a monu-

gent partners of the soil. Lavinia general public. For the opening years which this young man came to the Britain's average prison population commands respect even while she of his career Miss Bowen's work is rescue of a land without natural should never be in prison at all. Give defenses, except of the most desper- them treatment which is really reate kind, at a time when it was formative in its essence from the overrun by the strongest monarch time of their first slip, and there is of the assassination of William's again at a lecture, on a bus, or in unfortunate rival, John de Witt, at Parliament. The Hague gives little satisfaction to the reader who is anxious for win thoroughly expose the inade-William's reputation. Granted that it quacy, to use a mild word, of the is not obvious what William might present prison system in Great have done, the assassins should Britain, and their criticisms perhaps never have been allowed, as they will apply almost equally to every were, to go unpunished. The most other country, except some states in that this incident, like the parallel writes with the lighter pen, and also one at Glencoe, is a case of "not with almost a Shavian touch of proved." Because she is unable to barbed satire. He is, however, mainly make a convincing defense of her destructive, and he frankly advocates hero in this key situation of his life, elimination of "the useless and Miss Bowen's interesting and sympa- worthless members of the comthetic account of William's early munity."
trials as a disinherited grandee fail Mr. Brockway, however, while

German-African Treaty Opposed

Britain Against Agreement That Customs Rebates Be Shared by Germany

SPECIAL PROM MONITOR BUREAU LONDON-The reason for British opposition to the much-discussed South African-German trade treaty is explained in an interview by J. Moir McKenzie of the Overseas Organization of the Federation of Brit-

ish Industries. The treaty, it may be recalled, provides that while present preferential customs rebates granted by Africa to Britain are withheld from Germany, the latter country is to share in any future preferences on other lines of goods. The treaty has been ratified by the German Reichstag and comes before the South African House of Representatives and Senate between now and next June, when the elections are to take

So far as can be seen," Mr. Mc-Kenzie said, "the position of British traders, provided the treaty is ould depend upon the main tenance of the present preferences. It FREEMAN HARDY & WILLIS these were withdrawn, then Germany would have absolute equality with Great Britain in South African Union markets, and the situation there of British manufacturers might become serious. They now have certain pref-erential rebates on textiles, hosiery, machinery, and rubber and electrical

Industrial Heads of New India Provide Model Housing Units

How Certain Mill Owners Under New Conditions Provide Homes for the Native Workers Who Cling to Tradition in Midst of a Changing World

far more comprehensive way than

Calcutta are India's famous jute mil's. The world's largest supply of jute comes from this section and the mills line the banks for miles. But the scene is vastly different from the usual industrial one of this character. Instead of unsightly railroad tracks. hide shyly in the folds of mother's piles of coal, belching chimneys, and sari. motley buildings, there are velvety green lawns and shrubbery sloping to the water's edge, piers that look as if they might be used for luxurious yachts, and buildings that resemble beautiful summer homes more than the domicile of whirring machines. Perhaps here and there, you may see one that is ugly, but in the main the river bank presents a beautiful spectacle of large, fine buildings, trees, shrubbery, lawns, graceful piers with, in the background, a tall smokestack that is in no way obtru-

Thousands of Indian Workers

These mills employ thousands of Indian workers. You see them in the offices, in the many buildings grouped about, pushing hand trucks ernment to study stresses in such on the narrow railways that run between the go-downs, as the warehouses are called. In certain sec-

from her little ones.

Where and how do these thousands of employees live? They are too far the bridge carrying the load.

The name hammer blow is applied to their work. Nowhere is the usual to the pulsating variations of pres-Indian village of thatched mud huts. that is representative of many, you

Pleasantly removed from the facneat homes with cemented streets, or board sidewalks between. Down the center of each one of these sidewalks runs in a cement gutter a sparkling stream into which the Indians dip their feet as they walk about or before entering their homes, about or before entering their homes, for the Indian dearly loves water for abbution purposes. These homes are of brick, whitewashed, and have tile roofs. You peep inside one and see the usual square room with mud floor and fireplace for cooking. In one corner is the Indian bed of broad one corner is the Indian bed of broad agrees to the efforts of the society to the stretched across a wooden to the society to the efforts of the society to the society to the efforts of the society to the society to the society to the efforts of the society to the efforts of the society to the efforts of the society to the society or earthen vessels for their simple household tasks. On one side stands the inevitable "box" in which personal belongings are kept, and if the occupants of this room number a musical member perhaps a drum or to give his full cooperation to the re-other musical instrument. Homes large families. Though in some re- their spects these houses resemble the home familiar and loved by the Indians, they are far better built, more cleanly and sanitary. The Indian of with thatched roof, no windows, and often an entrance so low he has to stoop to get in. So that these houses are palatial compared with his customary quarters.

Electric light is provided free, and there is plenty of artesian well water. This water alone is an incalculable blessing, for in his village home the water used for drinking and cooking often comes from a scum-covered pond. The light, too, of the village domicile is apt to be a wick floating in a shallow vessel of oil which provides plenty of smoke but little illumination.

For the Buzaar or Market

Within the section set apart for the homes is a big, open square for the bazaar or market. Around this are arranged stores, the whole place being cemented and sanitary. Vegetables, fruit, fish and other edibles are brought fresh every morning. Other wares are also sold. Weights, measures and business methods are under careful supervision of the mill company, so that prices are just and transactions honest. The place is bright with glowing oranges, sunshiny melons, red tomatoes, green vegetables, dusky brown eggplants, gleaming brass, dull oft tones of red earthenware, brilliant turbans, and the red, white, blue and lavender of Indian dress. The eye feasts on the color with the vivid blue sky overhead, the soft creamy tone of cement walls for a background, and PATTEN, MENZING & KING the constant movement of the Indian throng as it weaves in and out looking at goods and purchasing sup-

Seven thousand people are housed and cared for in this place, both Muhammadans and Hindus, who live

sparkling under the blue sky add beauty to the picture and provide facilities for bathing and-laundry work, for the Indian bathes many times a day and beats his clothes clean on the banks of a pool or stream. Golf links, tennis courts beautiful gardens and recreational grounds for the children and for hose whose play aspirations run to simple games are at hand. A staff of 29 sweepers whose sole work is to keep the place clean maintain it in spick-and-span order. Along the perintendents, clerks and others of the higher grade workers. Those for single men are in the nature of a fine clubhouse. Everything possible for the comfort, health and happi-

EARLY OCCUPATIONS

Who: JOHN PAUL JONES Where: Scotland, the United States

and France. When: Eighteenth century.

Why famous: An American naval officer who played a dramatic part in the War of American Independence. The boy, son of a Scottis gardener, was apprenticed to a shipmaster and so acquired a taste for the sea. At 17 he had become second mate on one of his master's ships, and a little later sailed as first mate on a vessel engaged in the slav trade. But the task was abhorrent to him, so he embarked on another ship to return to England. During the voyage the command fell unexpectedly into his hands and he brought the ship safely to port. But then John Paul suddenly surrendered his command, went to America and there disappeared. When he reap-peared, he had acquired the new surname of Jones, he was no longer a Scotsman but an American.

Thus, when war broke out between England and her colonies, John Paul Jones was ready; the Continental Congress gave him the commission of a first lieutenant. After a period of activity in American waters, he was sent to France to announce the surrender of Burgoyne. After that he the coasts of England and Scotland. him since childhood. And victory seemed always to walk abreast of

In 1779, having the rank of commodore, Jones was in command of five vessels, but in the historic encounter off Flamborough Head, he was deserted by all except two small vessels with which to meet two greatly superior British vessels. Nevertheless, he triumphed. The hero was received cordially at several European courts. He was decorated, too, by Louis XVI of France and by the American Congress. His later years were spent in France. He was a fascinating and a somewhat mys-terious character, absolutely fearless.

A Word a Day

Ardor This spelling of the word has been ommon since the sixteenth century but the English cling to and prefer "ardour." Both spellings are pro-

nounced alike.
Although derived from the Latin verb ardere, "to burn," our sense of ardor has been influenced by the Italian ardire, "to dare," the two ideas fitting nicely into each other. The primary meaning of ardor was flerce or burning heat as concerning fire or flame. Its secondary and most used significance is figurative, denoting warmth of emotion, fervent desire, zeal or eagerness. Formerly the word referred to evil or reckless efforts but now, happily, it indicates only generous and noble impulses.
"Fervor" is used most often to suggest devotion and piety, while ardor is the wave of emotion which accomplishes something by its eager-ness and intensity. "Enthusiasm" seems to embrace ideals or causes in its zeal, ardor is primarily individualobject or one person.

The first syllable of ar'-dor is stressed, a sounding as in arm, o as e

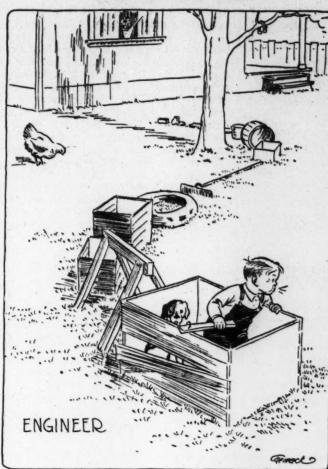

"The inquiry was pursued with ardor and perseverance." Note: Webster's first choice is accepted as authority for pronunciation.—Ed

The Children's Corner

"That Trip Was Soon Over"

VERY year, just as dwellers on came to the brow of the hill. He Boston Common, reading the stopped, puzzled. What were those clear skies and sniffing the six two low. clear skies and sniffing the air of late February, begin to dream of tulips in the Public Garden and of tulips in the Public Garden and of busied himself making surprise at tulips in the Public Garden and of tacks and harassing shipping along swelling sap in the sugar maples, Old Man Winter delivers several tons He would appear suddenly in remote of snow. It is evenly spread over harbors which had been familiar to walks and turf and trees—a very neat job of delivering, in fact-and really is not unwelcome.

two sticks slid. And with the old squirrel standing on them, away they At least the Commoners who count

Like the Wind Went Scroggins. His High Silk Hat Flew Off, His Tippet

for anything - Florrie the pigeon, Fib the sparrow and Mr. Scroggins the old squirrel—do not look on late snows with unwelcome eyes. It means frolics and happy hours of watching the new world which has een molded out of the white flakes. All day and most of a night it had snowed. Mr. Scroggins looked out at the dazzling whiteness with

snapping eyes.
"My dear," he said to Mrs. Scrog-"we must get out into it soon. She agreed that his idea was sound. So soon it was. Tippeted and warmly gloved, the Scrogginses fairly scampered as they

left their home in Ulmus Americana (American elm) and made their way down the freshly cleared board Here was Florrie, almost jovial, alhough her right eye did wink slightly as she saw the two old dar-lings skipping along like squirrels of two years. Here was Fib, chippering and hopping excitedly, darting his itials, instruments, ink, inches, inlittle beak into the flakes and fairly

screeching with pleasure.

They all set off for the hill overlooking Charles Street, chattering and romping, throwing snow and darting off into it, to be almost covered in the thick blanket.

Q. What is the difference between the Prince of Wales and the water in a fountain?

A. One is heir to the throne, the

lying in the tracks. He walked up to them. He put one foot on one of them and the other foot on another, and suddenly he began to move. The

flew. Loud shouts of approval went ap from his two friends and from Mrs. Scroggins. Like the wind went Scroggins, His high silk hat flew off. His tippet streamed out behind. Faster and faster, down the hill and over the

evel space beyond.

what no one will ever know. Perhaps the two stick-like objects became slightly mixed. Anyway it was sudden. And Mr. Scroggins was far from being prepared for it. So unprepared was he, in fact, that he shot forth from the two sticks as though he were a ball thrown by a baseball pitcher. Through the air went the gallant old squirrel. And since he could stay in the air only a certain length of time. he ended up by plunging head first into the soft snow. It flurried up from him just as the spray dashes from a ship. For a second or so he completely disappeared. The snow stead of his usual self, he was a

snow squirrel. Snow clung to his head. Snow powdered his swingtail coat. Snow was all over his waistcoat, his legs, his arms. Great shouts went up from Florrie Fib and even from Mrs. Scroggins. They shrieked with delight, Nothing

so amusing had happened, it seemed to them, in many a day.

And Scroggins smiled. Then he laughed. And the laugh was powdered with snowflakes. As he toiled back up the hill, Florrie, winking one eye and looking straight ahead with the other, said more to herself than to the world

Well, that trip was soon over."

Record only the Sunny Hours Relief Work

North Saugus, Mass. HEN the North Saugus home of John Reilly and his 11 children was burned down Thursday night, John believed that his troubles had only begun, For, in addition to providing a home for his family, he also had the problem of

furnishing it. But John has neighbors, and good-hearted ones, too. They banded to-gether and decided to act, with the following result:

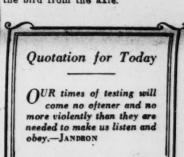

Bernard Corbett, a business man of Saugus, donated a house in North Saugus, rent free, to be occupied by the Reillys until they get upon their The entire district was searched

for spare furniture and within a few hours, beds, chairs, tables and every-thing else that goes to make the home complete was moved into the house donated by Mr. Corbett. Women who had been knitting quilts, crazy quilts and other practical home furnishings, immediately donated them.

Before the night was out, John Reilly, his wife and their 11 children were installed in the new home, fully

furnished, even to the wood and coal in the bins in the cellar. It was a sample of practical relief work.

Bird Released FROM a number of sources, thanks to alert and co-operative "Sundialers," have come reports of the bird incident at Macomb, Ill. A sparrow had hopped upon the axle of a box car on which were a few drops of moisture congealed, perhaps, from the steam of a passing locomotive. There the bird sat until the tip of its tail and one foot were frozen fast. When the train started to move, round and round went the bird-a loop the loop experience dictated by circumstances and not pleasure. Then something happened, just Fortunately a trainman observed the bird; the engine was stopped, and a warm rag from the firemen thawed the bird from the axle.

In Lighter Vein

Just Sense Young Man: "If I may ask, what the secret of your wealth?"

"I'll tell you what, Muriel, I'll have six whacks at mine, then you have six

whacks at yours."

The Feeding Part Pat had seen nearly every clock in the place, but had discarded all of them as not being good enough for his purpose. The patient shopman had exhausted his whole stock except a few cuckoo clocks, so he brought one orward as a last resource.

"Well, how do you like that?" asked the salesman. "That's a staggerer for you, isn't it?" "Faith and I should think it is! It's trouble enough to remember to wind it without having to think of feedin', the bird."—Montreal Star.

or many years, yet their common interest had not developed a taste for even small talk. They met one mornng and one greeted the other: 'Going?' "Been."
"Any?"

"How did the new car behave on "Splendidly. We averaged five anque shops to the gallon."-

"I'll show you what they do," said the salesman, and he set the hands at 12 o'clock, when the door flew open and the cuckoo thrust its head out and cuckooed. Pat was impressed.

Compression Fishing develops reticence. Two friends had fished the same stream

"Some." Cutting Corners "Petrol has gone down."
"Yes, I am so pleased!" "Are you buying a car?" "No, I am going to clean my oves."—Guerin Meschino, Milan.

Mexico at the Crossroads

S THE armed uprising in Mexico to be a revolution or merely a revolt? The answer largely depends upon whether it is actuated by a unifying patriotic motive or by separating selfish ambitions. So far unity of action has been shown in the simultaneous coups in the widely separated states of Vera Cruz and Sonora. Unity of purpose is not so clear. A pronunciamento by Gov. Fausto Topete of Sonora demands that "perpetuation in office cease," and declares Calles, the former President, is still the actual head of the Government. This is an attempt to revive the "no re-election" cry which was a feature of the Madero revolution that overthrew Diaz after three decades of re-election.

The rebels cannot charge Calles with seeking re-election, but they claim he has in effect perpetuated his rule through Portes Gil, the Provisional President, and through the National Revolutionary Party which he has organized since his retirement last November. The only other purpose so far indicated by the insurgents is disclosed in Governor Topete's first decree after announcing his break with the Federal Government. It annuls the national laws regulating the activities of the Roman Catholic clergy. This is connected with the report that the rebel movement is in the interest of Gilberto Valenzuela, former Minister to Great Britain, who recently appealed for Roman Catholic support of his presidential candidacy. The Federal Government has repeatedly referred to recurrent outbreaks in the last two years as the "Catholic rebellion."

Another factor known to affect the situation is the Obregonistas' growing dissatisfaction with the leaning which Calles has manifested toward Labor, and particularly toward Luis M. Morones, head of Crom, the Mexican branch of the American Federation of Labor. Some of the agrarian elements have been alienated by this rift, and it is notable that nearly all the leaders of the present movement are men formerly close to General Obregon. This, however, is largely a personal controversy and hardly affords grounds for a great political overturning.

Mexico stands at the crossroads. What it most needs, perhaps, is free elections. The orderly transfer of office from Calles to Portes Gil-a civilian-and the present Government's action permitting political exiles to return and openly denounce its rule in their campaigns had indicated some progress in that direction. Therefore, the responsibility rests now upon those who have resorted to arms to prove that no better recourse remained to them. Unless they can do so, public opinion may well decide against them. If backed by it, the Government appears able to weather the storm. In that event it may be demonstrated that armed strength alone can no longer rule below the Rio Grande. That would be a revolution worth while. Sooner or later the lesson of moderation must be learned, both by those in power and by those out of power. Violence breeds violence. Today's revolution-if it be such—is designed to overturn a Government which itself proudly claims the title, "revolu-

tionary. It has been said that a nation gets the kind of government it deserves. The next few weeks should show whether Mexico deserves anything better than "caudillismo"-the rule of military chieftains.

The Lame Duck Session Departs

"T TAKE nothing back!" cried Vice-President Dawes at the conclusion of the last legislative day of the Seventieth Congress, just before the inauguration of President Hoover. He was referring to his repeated declaration that the Senate should revise its rules and institute some form of effective cloture that would shut off too eloquent members and prevent filibusters. Mr. Dawes' record is at least consistent. First, when he was sworn in, in 1924; again at the end of the stormy filibuster and all-night sessions in 1927; and now as he leaves office, he has pointed out that the Senate is, and remains, the only great legislative body in the world where a minority can prevent a majority from bringing a given matter to a vote. Two methods have been proposed for keeping the Senate's oratory within bounds. One is the Dawes plan for a change in Senate rules that could be invoked by a majority vote to cut off filibusters. Another plan is the more far-reaching but perhaps more satisfactory proposal of George W. Norris, Senator from Nebraska, which has several times passed the Senate, for an amendment to the Constitution to abolish the Lame Duck session altogether. This would remove two

archaisms in the present senatorial procedure. In the first place, it would eliminate filibusters by providing two equal sessions of Congress, either of which could be extended to run a full year if necessary. Since the filibuster, in its essence, is a method of talking against time and is only effective when a definite day and hour has been set in advance for adjournment, the Norris plan would accomplish its first object of

preventing such dilatory tactics. Secondly, and equally important, the Norris amendment would cut down the extraordinarily long interval now existing between the election of a new Congress and its taking office. In every other great democracy a national referendum is

followed, as a matter of course, by the almost immediate convening of the new Parliament. Not so in the United States. The November election is long past, but the Congress that has remained in power up to now is the old Congress, containing many "lame duck" members defeated at the polls who continued to pass legislation though repudiated by the electors. Except for Mr. Hoover's extra session, the new Seventyfirst Congress would not normally be convened until next December, thirteen months after its election, at a time when many of the representatives would already be preparing to enter the preprimary fight for their own re-election!

Although important legislation was caught in the jam at the end of the Seventieth Congress, while other vital bills were compromised unreservedly as the only possible hope of securing action, yet congestion was far less severe than two years ago. That was a supreme illustration of what short sessions and filibusters can accomplish. A deadlock over a bill caused two groups of senators to talk for hour after hour on wholly extraneous matters, and as a result the great second deficiency appropriation bill, which had no part in the dispute, failed to pass, leaving the Government in the humiliating position of having no funds for scores of officers and departments. A condition where such a crisis can arise is an extraordinary anomaly in a nation that prides itself upon its efficiency in private business. As affairs are at present, the United States is living in an airplane age, but with legislative rules that antedate the steam engine.

What Is Democracy?

S EVENTS, in orderly sequence, led up to As EVENTS, in orderly sequence, led up to the retirement of Calvin Coolidge and the inauguration of Herbert Hoover as President of the United States, there never was the slightest indication, outwardly at least, that even the partisan most bitterly opposed to the election of the incoming Chief Executive entertained any thought that the decision rendered in November last might be set aside. The verdict stood as the definite pronouncement of a majority of the voters of the country, and as such was accepted by the unsuccessful minority as well as by the millions of qualified electors who took no part in the processes of selection.

It may be said, therefore, that a nation which thus functions in its most vital and important operations deserves and rightly receives a place on the roll of democracies. It having by constitutional provision arranged to delegate to those selected as executives and administrators the authority actually vested in the individuals comprising the body politic, the transfer of power, both executive and legislative, is automatically transferred from the old to the new.

No seriously disposed person in the United States, whatever may be his prejudices, political or otherwise, will venture the assertion that the orderly processes might have been reversed had the November election resulted differently. Within comparatively recent years there have been complete changes in administration in Washington. The slate has been washed clean more than once, and with the exception of the 1876 election, when the result was declared only after long delay, the orderly processes have not been threatened with interruption.

With a deep sense of gratitude the people of the United States compare their own procedure with that in less fortunate countries where no really clear ideal of democratic government has been imposed upon the consciousness of the majority. In Mexico, at the moment, the authority of the established order is threatened by an assertive and aggressive minority unwilling to accept as supreme the authority which has been delegated by the voting majority. The need is that there be gained there a clearer conception of democracy as an institution and a better understanding of the rules of the game. The form of government counts for but little unless those responsible for its maintenance have established it as a true expression of their own

Briand Asks the Question

FEW minutes before the French Parlia-A ment ratified the Pact of Paris by the overwhelming vote of 570 to 12, M. Briand addressed this remark to his colleagues:

Some day it may happen that one of these signatories may break his word. On its side the League will be at work. And does anyone here for a moment imagine that the United States, custodian of this pact, will permit the means to be supplied to such a country to perpetrate its crime? For my part I believe that there, as everywhere, there will be such a revolt of the popular conscience as to compel any and every government to act in the faith and spirit of the pact.

M. Briand poses the inevitable question, and as one of the original sponsors of this treaty and as its co-negotiator with Frank B. Kellogg, it is with entire propriety that he voices an inquiry as to what will be the likely policy of the United States with respect to a nation which has gone to war in violation of their mutual pact. The question should, however, be addressed not alone to the United States but to all the nations of the world, for the members of the League of Nations themselves are not in agreement upon the attitude which they will take with respect to a country which has transgressed the Covenant. Theoretically the Council, if it were able to reach a unanimous decision, would determine such a policy for the League, but by official interpretation no member is bound by the Council's recommendations, and thus any concerted international action is by no means assured.

The issue is one of incalculable moment. Prior to so recent a date as Aug. 27, 1928, when the delegates of fifteen nations gathered in Paris to initial the Briand-Kellogg treaty, war stood as the recognized court of last resort in international controversy. Today war stands outside the pale of international law, and the powers which have entered upon this solemn pledge must eventually determine what policy they shall pursue with respect to a warring nation. Article 16 of the League Covenant and its qualifying interpretation contemplate that the peace-pursuing members of the League cannot look with indifference upon war. The Capper and Porter resolutions now before Congress recognize that the United States, no less, cannot look with indifference upon war. The question is one which must be approached from the viewpoint of open-minded inquiry, not with

dogmatic preconceptions, and it is better that the nations should examine it and seek agreement during the clear-sighted days of peace, rather than delay until the strain of emergency seeks to bend their views with fear and distrust.

Canada Looks Up

ANADA has a story of notable prosperity to tell the world through the medium of its budget as well as through the encouraging statement of the progress recently made by the Canadian National Railways. The main features of the budget included a reduction in the national debt, amounting to nearly \$70,000,000, a prospect of lower taxation, a substantial increase in estimated revenues for 1929 and a favorable trade balance of over \$154,000,000 for the first ten months of the fiscal year.

Added to this propitious outlook is the report of Sir Henry Thornton, president of the National Railway system, which is sufficiently promising to cause its shareholders (the Canadian people) of this, the greatest governmentowned line in the world, to heave a sigh of relief. When the Dominion took over the enormous obligations of the several companies now constituting the national system, covering 22,729 miles (some of which were little better than financial wrecks), the most cheerful Mark Tapley of them all could only look upon their enforced undertaking as a white elephant. This mythical beast is, however, turning out a very lively animal indeed, and the friends of public ownership in Canada are correspondingly gratified.

In a nutshell, the position is that net earnings were increased by nearly \$13,000,000; the gress earnings were \$276,631,000 and the operating ratio was reduced by some 3 per cent. When Canada took over, the various railways several years ago, it had to assume obligations of \$3,000,000,000 and in this connection one Canadian paper, says: "Much of this Canada will have to credit to experience and write it off the books of the Canadian National." In spite of this heavy load the system is declared to be in a most prosperous condition, the surplus for the railway year of 1928 being about \$7,000,000 after paying all charges, with the exception of interest due the Government.

Canada is unquestionably on the high road to an even greater prosperity than ever before, a prosperity well earned by its hardy sons, who have pre-eminently shown patience, endurance and vision in the building up of their fair Dominion.

The Awakening Month

As AN old saying has it, "Spring has come when you can place your foot on three daisies at once." According to this token, spring, in the North at least, has not arrived, any more than .day is abroad at the first touch of dawn; but March, none the less, is the awakening month. While as yet the dislodged and unquiet winter lingers, spring is pulsing out of the

He who is acquainted even a little with nature's manners has observed that the sun has already covered nearly one-half of its northward course along the hill-top horizon; and he therefore knows that somewhere the "chaste snowdrop, venturous harbinger of spring," has responded to the sun's call; while the first birds have variously warbled the announcement of their arrival from the South. Few there are who do not find the wakening of the year full of interest, with its symbols of happy renewals.

Even if one may not yet have seen the first yellow crocuses in a garden plot of fresh young grass, a dozen white and purple ones, blooming in a bowl of moss, on one's desk, aver that flowers know their cycles and bloom when it is timely for them to do so. The more venturesome trees have already enveloped themselves in elusive atmospheres of yellowish green; the bare branches of the aspen show color under their bark; and shrubs are industriously painting their stocks with unmistakable tones of purple or red, for trees and shrubs are in their own way preparing to welcome spring.

According to the climate, east, west, north, south, nature lovers are eagerly watching the signs of oncoming beauty. Its message is felt in the keen, fresh winds that blow, perhaps, over fast melting snow. The welcome light comes a little earlier in the mornings and falls more lingeringly upon the furrows that someone in some sunny clime may be turning in his field.

There may be interruptions and apparent delays even after color and song have given the signals of spring's approach. There may be a few farewell appearances of blizzards, and some icy pavements. But these will quickly pass, for each day the warming sun, speeding northward, speaks from a lesser distance to responsive trees and fields; each evening's horizon is recording the northward flowing afterglow, in banners of crimson and mauve and gold. It may not yet be spring, but

Some springy shrub, a scarlet gash on the grayness, Climbs, flaming, over the melting snows.

Editorial Notes

Yellow in Florida denotes wealth just as much as that color means gold in the Klondike and ripening grain the world over. Florida's recent Orange Festival displayed this wealth of fruit, all in shades of yellow: Eleven varieties of oranges, six of grapefruit, three of lemons, two of tangerines, three of kumquats; also limes, shaddocks, limequats, calamondines, mandarins, tangeloes, and loquats.

When the engineers say that 8,000,000,000 tin cans were used last year in the United States they really mean "tinned" cans, for the cans in question are only thinly coated with tin. Tin is quite expensive, being quoted around fifty cents a pound, while copper costs but eighteen cents a pound. A curious characteristic of tin is that it emits a peculiar squeak when bent.

Right in the midst of the Hoover inaugural, but not a part of it; this was the unenviable lot of the citizens of Washington, who were denied the right of voting for either Mr. Hoover or Governor Smith.

To the baseball fan, spring will come when the teams start northward.

Kansas Sunshine

THE traveler to the Southwest by the Santa Fé spends the greater part of a day in crossing the State of Kansas. He will, perhaps, recall that in the geography of his youth this great prairie state, 400 miles in length by 200 broad, almost a perfect rectangle, was the measure for all other states of the Union: all were judged large or small according to the ratio which their area bore to Kansas with its 80,000 square miles, an area larger than all New England and larger than several of the European states. To cross its vast extent from east to west is indeed a day's journey.

On a mid-February day we pulled out of Kansas City, Mo., and in a few minutes, having extricated ourselves from the tangle of tracks which make this one of the great railroad centers of the country, straightened out our course and headed to the West in almost a direct line across the State. The traveler who finds interest in every country he traverses is more than likely to contrast the present journey with some past experience. And so, as we speed away over the level miles of plains, we recall the last time we made the journey in May, when the earth was clothed in new green, the air thrilled with the songs of feathered hosts, and all the world seemed to rejoice. But even now the dim landscape contains much of interest, and it has, withal, under the full sunshine of a cloudless day, a beauty that is unmistakable.

Along the creeks which wind their devious way across the level miles grow white-barked cottonwoods and stately sycamores, so light in color that to New England eyes they might easily pass for white birches. Elm and oak stand in the lowlands, and stretches of well-grown forest, planted by the first homesteaders, dot the landscape. One misses, above all else, the evergreens of New England. No pine or spruce, no fir or hemlock, lends its somber green to the monotonous dun of the landscape. In the distance the cottonwoods present a soft gray appearance, almost like Corot's silvery foliage of the French spring. But much as we should like to believe that the transforming magic of the oncoming season is already at work, we are constrained to believe that the delicate shade is but

1 1 1

the color of the bare branches seen en masse. Stretching away in countless miles, the fields of winter wheat are just taking on the first faint touch of green, and even now along the hedges where the melting snowbanks lie the emerald of spring catches the eye. sure, in many fields of last year's corn, shocks stand disheveled and sagging; while in others, where stalks stand ungathered, the long blades bleached and lifeless flap idly in the breeze. Herds of fine cattle, mostly the square-bodied Herefords, feed upon the dry cornstalks and the stacks of straw which surround the farmsteads Bins of golden corn like huge pumpkins stand beside the red barns, and fat swine—red Jerseys—root complacently in the black soil.

An air of prosperity pervades the country, and there are few signs of poverty. We believe that Longfellow's characterization of the countryside at Grand Pré, "There

the richest was poor, and the poorest lived in abundance,' may be an accurate estimate of the conditions of the sturdy farmers of the Kansas plains: poor, that is, in the sense of wealth as accumulated in the great centers of the country; rich in the abundance which makes available the solid comforts of life, the comforts which spell general well-being.

We miss the birds. Although scanning the flying landscape for hours, our eyes have been rewarded with but scanty representation of the feathered hosts which in a few brief weeks, coming up in great waves from the Southland, will take possession of farm and ranch, of village and city park, will infest the groves and thickets along the creeks, pouring out a continuous chorus of happy melody as they settle down for the season's work. Almost inestimable is the economic benefit of these friends of man in the service they render the farmer in protecting his crops. And now with the additional protection provided by the Norbeck Bill just passed by a wise Congress, the service rendered will be greater than ever.

Grasshoppers, from depredation of which Kansas has at times so greatly suffered, will cease to be a menace when the protection of birds is really adequate. Small bands of crows hunt for stray kernels in the abandoned fields, and now and then a meadow lark springs up and hurries away from the noisy train in direct flight. These are the songful meadow larks which in vocal ability greatly surpass their eastern congeners. Stray mourning doves quarter the sky, and now and then a marsh hawk is seen skimming over the sodden field.

But as the search brings little reward, we are content to view the landscape as a whole and dwell upon the colorful history of this State, whence have gone forth throughout the Nation so many of the sound qualities which have built the nobility of American manhood and womanhood. The early struggles of Kansas against the blighting hand of slavery, as well as her early and earnest efforts to throw off that other blighting curse, the evil of strong drink, are outstanding examples of the type of citizenry that has been reared under the blue which bends above these level plains.

The plains of Kansas, no less than the granite hills and rock-ribbed shores of New England, have contributed their full share to the development of idealism of the type which we have come to denominate as "Americanism." These thoughtful farmers, apart from the busy centers of the country, have thought through many of the great problems which have faced the country, and have played no small part in furnishing practical solutions

Meantime the long shadows of the straw stack and cottonwood bespeak a westering sun; and as the lord of day moves serenely to his setting, the stark fields are bathed in a rosy light. A great sense of peace and quiet seems to settle upon the earth, and we plunge along into the night, marveling at the immensity of the country and dreaming of the great West that still lies yonder.

Letters to The Christian Science Monitor

Brief communications are welcomed, but The Christian Science Monitor Editorial Board must remain sole judge of their suitability, and this Board does not hold itself or this newspaper responsible for the facts or opinions presented. Anonymous letters are destroyed unread.

"Reorganizing the State Department"

TO THE CHRISTIAN SCIENCE MONITOR: I have just finished reading the editorial entitled "Re-organizing the State Department" which appeared in the Monitor of February 19. I only wish that every newspaper in the United States would either publish this editorial or write one itself on the same subject, because if this were done that great weapon "public opinion" would in a

very short time bring pressure to bear upon the Government to hasten the reorganization of this "neglected branch of the Federal Government."

I have resided in the Latin countries for the last thirty years, during which time, I regret to say, the diplo-matic and consular officials of the United States have not always been what I felt they should have been, in view of well afford to have a much more capable and efficient class of men as a whole. In the past it is a well-known fact that, especially in the diplomatic corps, only wealthy men or political favorites were named to represent the United States. I can recall many instances v absolutely ashamed of the men who were supposed to be there has been a very marked improvement during the last ten years both in the diplomatic and consular services. Nevertheless the "disagreeable" fact remains that American representatives in both departments are the poorest paid men, judging them from a relative standpoint, of any country in the world. This according to my way of thinking is not at all in keeping with the high ideals that the United States as a nation stands for.

The article goes on to say that "The American people spend under \$1,500,000 a year—less than the cost of a submarine—on what is probably portant branch of the Government." If this is correct, then is it any wonder that the Nation's State Departmen

needs reorganizing?

The next to the last paragraph of the article gives the true answer in my opinion as to why the United States finds itself with such a deficient diplomatic service. I will quote the following: "The department has never made a thorough survey of its administrative needs, nor has it energetically presented its case for increased appropriations to Congress." This is the whole story right here, as cannot believe that the country will refuse to appropriate funds for such an important branch of the Govern provided the need is properly understood. In the past I have noticed that there has been a sort

aloofness between America's consular and diplomatic officials, the latter apparently feeling they were in the "highbrow class," but here again things show signs of great improvement, as I find that America's popular Ambassador to Mexico, Dwight W. Morrow, has called general meeting of all the consular officials in Mexico, to meet and exchange ideas about general conditions that country. This is exactly what is needed between the two branches to bring about a better co-ordination of efforts. Mr. Morrow certainly deserves great credit for setting this precedent, and I am sure that it will soon beneficial results. We can expect to see Mr. Hoover take a hand in getting

the State Department properly straightened out, as there is no doubt that with his versatile experience he knows st what is needed to be done, so that during his administration we can look forward to much improvement.

"Outlawing the International Duel"

TO THE CHRISTIAN SCIENCE MONITOR: In the article "Outlawing the International Duel,"

appearing in the Monitor of February 18, the point is rought out that dueling and war resemble each other and that war can be abandoned only by making it—like dueling—illegal. In this connection, however, the Chicago lawyer quoted admits that "laws are sometimes broken" consequently that war, even when internationally outlawed, may occasionally break out,

The difference between dueling and war, however, is that the former was mostly resorted to as a supposed settlement of "honor," which fighting of course could never truly settle; whereas in war the objective is generally-even if veiled-the acquisition of indemnity. ritory, trade, wealth, etc., and in this, alas! the victor has been seemingly justified by gaining the things for which itself, and the victors have certainly paid as heavily as the vanquished, if not more so.

When it is universally recognized that there are, in the future, to be no more spoils for the victor, and that national law successfully prevents all private gains, the call to arms will be robbed of its raison d'être. This will be a hard, matter-of-fact conversion, touching the human consciousness through the pocket in a way that will cer-tainly abolish war. Talk, laws, and treaties alone will do little for future generations; but education must convince young and old that war is a thoroughly uneconomic proposition in a world which has become one great busiproposition in a world which has become one great business market, with the advantages of modern natural

science, speed and travel available to all; and it must science, speed and travel available to all, and it index prove incontrovertibly that loss and gain will be so equally bartered by war that the quotient will be nil to all concerned, and the waste of life and ability wholly retrogressive. Boston, Mass.

The Wardrobe of a Well-Dressed Man TO THE CHRISTIAN SCIENCE MONITOR:

Much has been printed and said of late in reply to the report by the Associated Press as to the fashion report of the National Association of Merchant Tailors at their recent convention in Philadelphia; and I observe, mostly

It is not surprising that men, who are not accustomed to dress correctly, would come to a rash conclusion that such a statement is ridiculous, without giving the sub-

ject any thought or consideration. report very specifically speaks of what the wardrobe of a well-dressed gentleman should constitute. Here room for thought.

It does not mean that every man should own twenty business suits to select from each morning for going to his business. I am quite aware that some men can get by nicely with a single suit for their business and any other calling, but as to the well-dressed gentleman who is called upon to attend all kinds of affairs, it is quite a different proposition, and as an authority fashion I consider the statement is not overrated.

A well-dressed gentleman will in the first place respect the calling for formal social evening functions where dress evening suit and not in a tuxedo suit which is only suitable for semi-evening dress affairs. Nor would a welldressed gentleman appear in a business suit at formal day functions instead of the required day-dress away suit. Neither would a well-dressed gentleman wear business or dress clothes for sport wear and vice-versa. Considering that the well-dressed gentleman requires

more than one single suit of the various kinds of clothes, which his standing in the social and business world requires of him, if one stops to think and figure, one will find that the number is conservatively stated. The report does not state that a man requires twenty suits to be a gentleman, but it does state that a gentle-

man requires that many suits to be well dressed. Not in the sense to be well dressed for business, but in the sense of a well-dressed gentleman for all sorts of affairs from Therefore I contend that a gentleman, to be well and correctly dressed, should own as many suits as his social

standing requires; this statement applies to overcoats and accessories also.

V. P. VAN NESTE. Boston, Mass.

"Always Damaging Something"

To THE CHRISTIAN SCIENCE MONITOR: Letters to The Christian Science Monitor under head-

"Nations But Large Families" and "Reasons for Abandoning War," February 9 and 11, respectively, make significant a recent incident in my experience. Some time ago I noticed a five-cent piece that had been defaced. On one side it bore a name and initial corre-

sponding to the name of a boyhood chum of mine. The inscription was clear cut and regular as if stamped on with a die Thinking my old chum might possibly have been the

one responsible, and believing him to be a resident of a certain southern city, I directed a letter to him inclosing the nickel. In some ten days I received a reply which in-

Was surely glad to receive your letter. It came as a complete surprise. While I cannot recall any such nickel, still it would not surprise me if it did originate from my hands while in the army, as we were always damaging something. There was nothing to indicate that these words were

said in fun, and as a serious statement they deserve thought. Is it not most strange, indeed nost unnatural, that mankind, endowed with the faculty of reason, and realiz-

ing how much longer time is required to build than to tear down, should suddenly divert years of slowly accumulated wealth, knowledge and constructive effort into a highly organized purpose of "damaging some-

In this light, is it any wonder that war, the only expression of which is a mad method of destruction, should be followed by a wave of subnormal moral control that is costly in many ways?

In the same way that a school-teacher might press a finger against a terrestrial globe until the globe moved before this pressure (the globe being complete and whole, not a fragment), so the upheaval which war precipitates as it touches a spot on our globe, affects the

Therefore it seems logical that nations should band together in the common good of all, from an economic as well as humanitarian standpoint in the decision that men shall no longer legally set out "damaging something."
Chicago, Ill.
Wilbur P. Robinson
